Millennium Development Goals: 2013 Progress Chart

The eight Millennium Development Goals (MDGs) were derived from the Millennium Declaration, adopted by all United Nations Member States in 2000. Through the Declaration, world leaders forged a commitment to combat poverty, hunger and disease, provide education to all children and equal opportunities to both women and men, protect the environment, establish a global partnership for development, and to achieve these goals by 2015.

The MDGs provide a framework of time-bound goals and targets through which progress can be measured, using a baseline of 1990. This chart presents an assessment of progress towards selected targets on the basis of information available as of June 2013. The latest available data for most indicators refer to 2011 to 2013.

The progress chart operates on two levels. The words in each box indicate the present degree of compliance with the target. The colours show progress towards the target according to the legend below:

Target already met or expected to be met by 2015.

Progress insufficient to reach the target if prevailing trends persist.

No progress or deterioration.

Missing or insufficient data.

* Poverty progress for Eastern Asia is assessed based on China's data only.

For the regional groupings and country data, see *mdgs.un.org*. Country experiences in each region may differ significantly from the regional average. Due to new data and revised methodologies, this Progress Chart is not comparable with previous versions.
